

Load ANSI 835 Remittance directly into Med Mgr

No DML? No Network Services? No problem... ansi2ers will take your ANSI 835 remittance files and load the data directly into the Medical Manager ERS module. Features include:

- Support for Windows, SCO, & AIX
- Configure the application for multiple carriers
- Simple batch processing to automate the load process

Support for Customization

While we don't often need to customize the ansi2ers application, we have the ability to customize the product for specific carriers and in specific situations. If you need custom support, please contact Micro-Office Systems, Inc. to discuss the details.
